Early-career Human Resource Management researcher with a primary focus on Algorithmic HRM, AI Governance, Psychological Contract Theory, and the Future of Work. Experienced in quantitative research using PLS-SEM, survey design, and empirical studies on AI-enabled HR systems. Seeking a funded PhD to advance research on responsible AI in Human Resource Management.

RESEARCH INTERESTS

Artificial Intelligence in Human Resource Management • Algorithmic HRM • Psychological Contract Theory • AI Governance • Organisational Trust • Employee Well-being • Future of Work • Organisational Behaviour

EDUCATION

MBA (Human Resource Management) | University of Delhi, School of Open Learning 2024 - 2026
CGPA: 7.56 / 10

M.Com (Human Resource Management) | Amity University Completed
CGPA: 9.04 / 10

Dissertation: A TAM-Based Empirical Investigation of Employee Acceptance of AI-Enabled Recruitment Systems in the Indian IT Sector

B.Com | Amity University 2021 - 2024

RESEARCH EXPERIENCE

Master's Thesis: A TAM-Based Empirical Investigation of Employee Acceptance of AI-Enabled Recruitment Systems

- Designed and administered a structured survey of 100 employees in the Indian IT sector, examining behavioural intention to adopt AI-enabled recruitment systems.
- Applied the Technology Acceptance Model (TAM) as the theoretical framework, testing perceived usefulness, perceived ease of use, and attitude as predictors of intention to use.
- Analysed data using Partial Least Squares Structural Equation Modelling (PLS-SEM) in SmartPLS, with descriptive and reliability analysis conducted in SPSS.
- Findings: attitude was the dominant predictor of behavioural intention, with usefulness and ease of use exerting influence indirectly through attitude; developed practical recommendations for responsible AI adoption in recruitment.

RESEARCH SKILLS

Quantitative Methods

- PLS-SEM • Survey Design • Scale Development (in progress) • Statistical Analysis • Literature Review • Hypothesis Development

Software

- SmartPLS • SPSS • Power BI • Microsoft Excel

TEACHING EXPERIENCE

Teaching Assistant | Vidya Bal Bhawan 2024

- Delivered instruction in management and commerce subjects to school-level students.
- Prepared lesson materials and assessments; provided individual academic support to students requiring additional guidance.
- Gained direct experience translating abstract concepts into material accessible to learners encountering them for the first time.

PROFESSIONAL / APPLIED EXPERIENCE

HR Associate Intern | TEN: Brain Research 2025

- Assisted HR teams with AI-assisted recruitment workflows, candidate screening, and recruitment coordination, including direct observation of algorithm-supported hiring processes that later informed my doctoral research interests.

HR Operations Support | Cook N Klean & Kinds Being 2025

- Supported recruitment, screening, and onboarding coordination across two organisations.

ACADEMIC LEADERSHIP

- President, Aparajit Sports Club — led club operations, event planning, and inter-college coordination.
- Vice President, Innovation & Entrepreneurship Cell — coordinated entrepreneurship initiatives and mentorship programmes.
- Organising Head, Sanagathan Conference (2024, 2025) — managed full event lifecycle for a large-scale academic conference.

ACADEMIC MEMBERSHIPS

- Planned: Academy of Management (AOM) — application to follow upon PhD enrolment.
- Planned: British Academy of Management (BAM) — application to follow upon PhD enrolment.
- Planned: National HRD Network (India) — to join ahead of application cycle.

SELECTED RESEARCH PROJECTS

Algorithmic HRM and Psychological Contract Reconfiguration (Doctoral Research Proposal)

- Proposed doctoral research examining how AI-mediated HR governance reshapes the psychological contract, employee trust, and well-being.
- Core themes: AI Governance, Organisational Trust, Employee Well-being, Future of Work.
- Designed as a phased study, extending Master's thesis findings into a validated multi-item model before scaling to a multilevel design.
